Faculty of Economics and Business Sciences

*Useful Information
for Exchange Students
Course 2013-2014*

Málaga University

The origins of the Faculty of Economics and Business Sciences

- The first Faculty of Economic Sciences in Andalucía opened in Málaga in 1965 and it was the fourth in Spain (after Madrid, Barcelona and Bilbao).

The Challenge of European Higher Education

- The Faculty actively participates in mobility programs and receives a high demand of applications from European students.
- Students ERASMUS-SOCRATES (Course 2012-2013)
 - Received 100-120
 - Sent 120-150
- Currently there are agreements for student exchanges with more than 90 European universities.

Continuous adaptation to the training needs of the environment

- The Faculty of Economics and Business is characterized by its ability to offer free seminars that complement the formal educational setting of their students.
- The Faculty organizes the **annual cycle of conferences: Economy and Society**, made up of four seminars for the purpose of recognized international economists.
- It is committed to the training of entrepreneurs with activities such as the **Seminar Emprende 21** that involves 500 students.

Degrees

- **Economics Degree**
- **Administration and Management Degree**
- **Finance and Accounting Degree**
- **Business Administration and Business Law Double Degree**
- **Economics and Administration and Management Double Degree**

All Degrees (except Double ones) have these characteristics:

- **4 academic courses are organized:**
 - × Basic training courses. (60 ECTS)
 - × Compulsory courses.
 - × Elective courses.
- **Nº ECTS credits per subject: 6**
- **Nº total ECTS credits: 240**
- **Teaching is divided into 2 semesters: 5 subjects each**
- **4th Course:** electives, entrepreneurship, internships and Final Project Work

However, from a basic knowledge in the previous subjects, each qualification follows a different route.

FACULTAD DE CIENCIAS ECONÓMICAS
Y EMPRESARIALES

Degree in Economics

- What training is provided?

Economics studies the management of scarce resources. Through constructing of models and the use of formal technique, there is an approach to the knowledge of economic reality.

- Objectives of studies:

To try to provide the best solutions to the allocation of resources.

Within the curriculum there are subjects of a different nature; therefore it is important to study both mathematics or statistics, as well as history or law.

Degree in Economics

- Careers:

Graduates in economics are trained to perform a wide variety of management functions, assessment and evaluation in economic affairs in general. This is both in public and private sectors.

The labour market provides employment opportunities in public institutions, financial institutions, private companies, as well as state official or international organizations (such as those belonging to the European Union).

Services as a consultant, tax advisor or financial analyst, as well as in educational institutions both in the public and private sector are also required.

Degree in Economics

■ Work areas:

The work is developed in both public and private sectors, incorporating into financial institutions, research services, consulting, tax advice, etc.

In this way, you can work as an economist in the ministry's, the autonomous councils, municipalities, town halls or public sectors, in international institutions or private companies.

It is also possible to engage in, for example, the profession of tax consultant.

Buddy Program

This programme results from joining the Student-Tutor Programme and PAPI Programme. Buddy Program focuses on the adaptation of foreign students to Málaga's university lifestyle. More than academic support, this programme seeks to help them with the daily tasks of a student at UMA living in Málaga such as administrative tasks and paperwork, the virtual campus, transport, cultural and leisure activities.

If you wish to take part in Buddy Program, fill out the application for foreign students.
