Welcome to the University of Malaga, a young, outgoing university, committed to providing the highest standards in teaching, research, student care and services. Through our experience, continual improvement and renovation, we shape a dynamic and efficient university, open to the world and focused on the future.

The university is located in Malaga, the capital city of the Costa del Sol. This cosmopolitan city on the Mediterranean coast, offers visitors a spectacular natural setting, enchanting streets, charming people and a privileged climate.

On behalf of the staff at the Centro Internacional de Español (CIE), we hope to welcome you on our Spanish Courses, which are offered according to the ECTS credit system and recognized as University of Malaga certificates.

Finally, I sincerely hope that you will enjoy your stay at our University and that it will be an enriching and unforgettable experience.

We look forward to welcoming you soon.

Carlos de las Heras
Vice-Chancellor of Institutional Relations and the Chancellor’s Office
INTRODUCTION

From its very beginnings in 1947, the Centro Internacional de Español of the University of Malaga (CIE-UMA) has combined quality teaching expertise with highly qualified academic and administrative staff. This has allowed our Centre to provide a wide variety of courses and programmes that meet the diverse and growing demands of Spanish language learners.

The University of Malaga fully participates in the internationalization process as carefully outlined in its Strategic Plans. As such, we have been entrusted by the university with the task of achieving the highest possible university level standards in the teaching of Spanish as a second language. We seek to provide language training to students who express—in a common language— the richness of their multicultural experience.

In this exciting task, those who are part of the CIE-UMA, work daily with students and universities, private companies and national and international institutions, to refine one of the most important internationalisation tools at present: the Spanish language, mother tongue and second language for hundreds of millions of people worldwide. Spanish for a global world: this is the objective which determines our work.

It is an objective for which Malaga is especially suited, since the city holds what for many other places is an unattainable dream. Its people are the product of a rich mixture of ancient, knowledgeable cultures, attracted by calm seas and a benevolent climate. Today, the people of Malaga integrate with people from many different countries who speak a multitude of languages. In this melting pot, Spanish is a koiné, or common language.

In this context, the CIE-UMA combines tradition and experience with the energy of our versatile and multifunctional Spanish. We warmly welcome those who come to share with us their lives and their voices: voices dedicated to fertile speech, a guarantee of understanding.

1. Business Spanish Course
The current trend of economic globalization generates many documents which need to be translated from one language to another. This week-long course covers the theoretical and practical study of the lexical, syntactic, discursive and stylistic characteristics of Spanish for Economics, Finance and Trade. The course focuses on practising and gaining knowledge of the Spanish used in corporate communication strategies in a wide variety of professional, written and oral genres. The course is designed to provide the techniques, methods and resources for students to develop the communicative, pragmatic and cultural competency needed in order to function in different business contexts.

2. Spanish for Tourism Course
A course which aims to consolidate and perfect the level of Spanish of professionals working in tourism or those interested in the field of tourism. The objective is, through linguistic, pragmatic and cultural content, to be able to function competently within Spanish and Latin American companies and institutions in communicative situations related to tourism.

3. Spanish for Health Care Course
This course is designed for those students who have knowledge of general Spanish, but who would like to gain knowledge of the language used in the field of Health Sciences. It meets the needs of students interested in acquiring and perfecting their knowledge of Spanish in the field of health, while at the same time improving their language skills in Spanish. The course covers all the language skills: reading, writing, speaking, and oral and written interaction.

4. Spanish for Engineering Course
This course is designed for those students who having acquired knowledge of Spanish for general purposes, would like to gain knowledge of the language used in the field of engineering. The objective is to acquire linguistic competence, both in general Spanish and in the language specific to the field of engineering, through the understanding and production of speech related this professional field.
9. TRAINING PROGRAMME FOR ELE TEACHERS

AREA OF ENGINEERING

1. Algorithms: Design and Analysis
Techniques for the design and analysis of efficient algorithms, with special emphasis on methods useful in practice.

2. Artificial intelligence in games
Introductory course on Artificial Intelligence. The topics may include: AI fundamentals; intelligent agents; heuristic search algorithms; adversarial game playing; reinforcement learning and neural networks.

3. Automatic Control

4. Biomedical Computational Modeling

5. Computer Design and the Hardware/Software Interface
The objective of the subject is to understand the design and organization of a modern computer and the connection between the software and hardware.

6. Concurrency and Parallel Programming
Concurrent programming, threads, Java, C, parallel programming, many-core technologies.

7. Data Communication Networks
This course covers the fundamentals of data communication networks, with the aim of providing insight on how networks are structured and how they operate, with special focus on Internet and Local Area Networks. The course cover topics from the physical layer, such as digital/analog transmission and multiplexing, up to the services provided to end users, in the application layer.

8. Database Querying is not limited to Computer Science
Relational databases have become a standard to store information. Until recently, database Access was limited to IT professionals. Nevertheless, nowadays a professional of any field has to be able to develop deep analysis of the data the manage in his professional environment.

9. Developing .NET Application with C#
Microsoft Visual C# is one of the Information Technology worlds most popular programming languages designed specifically for Microsoft’s powerful .NET platform. C# has become a language of choice for implementing Windows applications that integrate with the Internet and the Web and also for the development of ASP. Net Web Applications. This course help novices become literate in Visual C# developers.

10. Foundation for Signal Processing
Signals and Systems is an introduction to analog and digital signal processing, a topic that forms an integral part of engineering systems in many diverse areas, including seismic data processing, communications, speech processing, image processing, defense electronics, consumer electronics, and consumer products.
11. FPGA-based Digital System Design
Design of digital systems based on programmable logic.

12. Fundamentals of Programming
Computer Programming.

13. Hardware Platform for Digital Signal Processing
Design of digital signal processing systems based on hardware platforms including DSPs and FPGAs.

14. Intelligent System
A first course in Artificial Intelligence which covers both the symbolic and computational intelligence approaches.

15. Introduction to Computer Vision
Algorithms and methods to give a computer the capability to see, that is, to extract information of the world from images captured by sensing devices (typically, cameras) connected to the computer.

16. Introduction to Digital Signal Processing using Matlab
Digital signal processing is widely used in areas ranging from speech and image processing to advanced communication receivers. This course offers a theoretical-practical approach to digital signal processing, with extensive Matlab examples to illustrate the theoretical concepts.

17. Microbotics (Microcontroller based robotics)
This course will deal with microcontroller based robot design. It is focused mostly on design at the lower levels: electronics, mechanics. Design process will cover from components selection to microcontroller programming, in order to reach a functional prototype.

18. Network and Distributed System
Internet layered network structure. Basic protocol functions such as addressing, multiplexing, routing, forwarding, flow control, re-transmission error recovery schemes, and congestion control. Overview of link, network and transport layer protocol standards, following a bottom up approach. Introduction to wireless and mobile networks. This course will also give hands-on experience in network programming using the socket API in C and Java programming languages.

19. Physics for Video Games
Physics, Computer Simulation, Numerical Methods.
AREA OF ARCHITECTURE

1. Architecture and landscape
The content of projects, analysis and interventions to be performed in the semester will focus on intervention in an established urban and natural environment, with an important role in shaping their environment and the city as a whole, going through the various stages of a coherent overall design process, from the phases of the study urban, architectural and detailed designs.

2. Studio 6
The course will present two different project challenges. The first exercise will feature a small, controlled, conceptual project-study where fundamental themes such as light, form, and space are considered. Students will be encouraged to use their creative freedom and to explore different architectural variables in order to arrive at a final design solution.
14. INTENSIVE SPANISH COURSE IN THE AFTERNOON

This is the best option if you wish to learn or improve your Spanish language level in a short time during the afternoon. At the end of this course you will be able to understand and use Spanish in your daily life as well as having a better appreciation of Spanish culture through the supplementary activities on offer.

The International Centre for Spanish of the University of Malaga offers students a wide variety of activities to do outside of class time.

Every Tuesday and Thursday afternoon, students can learn more about Malaga and Spanish culture and society firsthand. On weekday evenings, our teaching staff organizes Spanish film sessions, talks on topics related to the culture of Malaga and Spain, together with visits to places of interest in the city, such as the Picasso Museum, the Alcazaba of Malaga, the Centre for Contemporary Art and the Municipal Heritage Museum.

In addition, students can enjoy a wide range of sports activities thanks to the collaboration agreement between Club El Candado and the University of Malaga. Club El Candado is a sports club which has a gym and also offers a variety of activities, such as sailing, golf, padel tennis, rowing, etc.

Apart from the activities we offer during the week, we also want students to take advantage of the weekends. So, every Saturday we organize trips to other towns and cities in the province of Malaga, such as Ronda, Antequera and Marbella. We also organize trips to other main cities in Andalusia including Granada, Seville and Cordoba.

If you like doing adventure sports, you can go surfing in Tarifa (Cadiz), skiing and snowboarding in Sierra Nevada (Granada) or scuba diving at one of the many diving centres along the coast.
These activities included in the registration fee of our courses are held either at the centre or elsewhere. They take place outside class time. Participation in these activities will be positively evaluated in the final qualification of the course.

- **Spanish Film Sessions**: Here you can see some of the best and most recent Spanish films. This is a great way to help you improve your Spanish, and get an insight into our culture.

- **Talks-debates**: These are informal presentations or talks on topics concerning Spanish culture and society, including its history, festivals, cuisine, customs, etc. The talks are given by our teachers and followed up by debates, a question time and student participation.

- **Visits to landmarks in Malaga**: Teachers accompany and guide students around the most emblematic sites in the city including the historic centre, museums, monuments, natural areas, etc.
Thanks to the collaboration agreement between the University of Malaga and Club El Candado, students can do a number of sporting activities either free of charge or at special rates. These activities include:

- Sailing
- Rowing
- Golf
- Padel Tennis
- Tennis
- Diving
- Pilates
- Gym
These activities usually take place at weekends. The prices of these activities have been set with our students in mind.

- We offer excursions to:
  - Ronda
  - Antequera
  - Marbella
  - Granada
  - Seville
  - Cordoba

- We organise adventure sport activities. Depending on the season, these include:
  - Ski / Snowboard in Sierra Nevada (Granada)
  - Surf / Kite Surf in Tarifa (Cadiz)
  - Diving / Paddle Surfing in Nerja (Malaga)

- We also organise other activities which, depending on your dates of stay at the Centre, include:
  - Carnival
  - Holy Week Processions
  - The Annual Fair
