Current position	Associate Profesor	From	2008
Espec. cód. UNESCO	220990 – Digital Analysis. Images		
Palabras clave	Analysis and image processing, Geographic Information Systems, Pattern recognition, Industrial Design		

## A.2. Education

PhD	University	Year
Bachelor's Degree in Topography Technical Engineering	Universidad de Jaén	1997
Bachelor's Degree in Geodesy and Cartography Engineering	Universidad de Jaén	1998
PhD in Geodesy and Cartography Engineering	Universidad de Jaén	2003
Bachelor's Degree in Fine Arts (BFA)	Universidad de Málaga	2009

## A.3. JCR articles, h Index, thesis supervised...

JCR articles: 10 (5 of them in the first quartile Q1). Received citations: 99 (Google Scholar), 92 (ResearchGate). Average citations/year during the last 5 years excluding the current year (2013-2017): 93 (Google Scholar)

h Index: 2 (Google Scholar), 4 (ResearchGate)

Supervised PhD theses: 3

Successful research evaluations (sexenios de investigación): 1 (2003-2011)

## Part B. CV SUMMARY (max. 3500 characters, including spaces)

My last research activities focus on digital image processing and geometric curve recognition on the engineering field. I'm member of the Graphical Engineering Research Group and our most relevant publications are related to this field have been published in the international journals with the highest impact (Q1).

Geometric adjustment is present in various fields of science, engineering and astronomy. Within circle, elliptical and parabolic forms are widely used in the digital analysis of images and pattern recognition. My contribution as a researcher is the study of the state of the art in the different fields, mainly industrial use of geometric shapes. I was working to obtain 3D images with the scanner and calibration of cameras through calibration patterns and experimental results.

My research interests are also on Geodesy, GPS, GIS and Engineering Education.
