MASTER IN EUROPEAN ECONOMIC STUDIES IN THE FRAMEWORK OF GLOBALISATION

UNIVERSITY OF MÁLAGA

Are you fascinated by the process of European integration and by the way it interplays with other regions of the world? Do you aspire to a career in which well-grounded economic, legal and political knowledge about European integration is indispensable?

With a one-year's postgraduate programme, students acquire an in-depth knowledge of the Economics, Politics and Law of the European Union. The Master in European Economic Studies in the framework of globalisation is aimed at providing students with the knowledge and tools essential for the proper understanding and interpretation of the European integration process in the context of globalisation, the reality and current affairs of our time.

Far from static approaches, the programme considers the process of European integration as a dynamic process that is "alive" and therefore susceptible to change, stagnation and twists and turns.

Place: Faculty of Economics and Business Studies,
University of Málaga

Mode: blended learning

ECTS Credits: 60

Languages: Spanish and English

Recommended profile: graduates in Economics and
Business Administration, Law or International Relations.
