

Confirmation Letter(COVID-19) on Exchange Student Program

<Must read carefully with the coordinator at your home university and your guardian(ex: parents) and submit it after signing a handwritten signature>

1. According to the Korean government's policies, every person from overseas (regardless of nationalities and the departure cities) needs to be quarantined for 15 days after arriving in Korea. Kyonggi University will not provide the dormitory for quarantine. The dormitory will not accommodate students who has not finished 15 days of quarantine. Therefore, students must finish their quarantine in separate accommodations other than the dormitory at Kyonggi University and must pay all fees related to quarantine.
2. If the situation in Korea or abroad related to COVID-19 is not good, Kyonggi University may cancel the exchange student program even one day before students' departure. Kyonggi University is not responsible for any loss or damage caused by this decision.
3. If the situation related to COVID-19 is not good in Korea, Kyonggi University can force them to return to their home countries at any time for the safety of foreign exchange students. Kyonggi University is not responsible for any loss or damage caused by this decision.
4. Currently, the Korean government requires all people who have visited the areas where cluster infection occurred to be quarantined for a certain period. Therefore, the Korean government, the Korea Centers for Disease Control and Prevention, local public health centers, or Kyonggi University may request students to be quarantined at any time due to concerns about cluster infection. All foreign exchange students must follow it. If they do not, they have to bear all the disadvantages(deportation order, fines and etc) caused by not following it.
5. Because the situation related to COVID-19 changes very suddenly and rapidly, the Korean Government and Kyonggi University will frequently give notices on policies or guidelines. The disadvantages (deportation order, fines, and etc) caused by not following policies and guidelines must be the responsibility of the students.
6. Even if the starting date of the 2021 Fall semester is delayed because of COVID-19, exchange students still need to arrive in Korea on the designated day. Should any student would like to change the arrival date since the starting date of the 2021 Fall semester is delayed, he or she must know that free pick-up service provided by Kyonggi University will be cancelled. Also, you he or she must solve all the problems related to quarantine like changing accommodation reservation etc.
7. Due to COVID-19, Kyonggi University may not be able to provide off-line classes(face-to-face classes). Even if off-line classes are provided, they can be changed to online classes at any time by Kyonggi University's decision.
8. Kyonggi University may not be able to provide students with field trip, Korean culture classes and the other activities because of COVID-19. Individual activities can be restricted as well.
9. If the flight to Korea is delayed or cancelled, students must immediately inform the coordinator at home university. If they are unable to take classes because of the delay and cancellation of the flight, Kyonggi University will try hard to solve the issue with the student's credit recognition following the guidelines provided by the Korean government or the Ministry of Education.
10. If the Korean embassy or Korean consulate refuses to issue a visa, Kyonggi University can

not take any action against it.

11. Foreign exchange students agree to be admitted to the quarantine ward immediately if they are found to be infected with COVID-19 during their entry into Korea or during their lives in Korea. Including the treatment fee. From 2020 Aug 17, foreigners who test positive for the new coronavirus will have to pay for their own treatment if they violate the country's disease prevention guidelines. Separately, foreigners entering Korea who test positive for the virus may have to pay their medical treatment, based on the principle of reciprocity between South Korea and other countries.

12. If you are unable to take classes and the test because you got infected with COVID-19, Kyonggi University will try hard to solve the issue with the student's credit recognition following the guidelines provided by the Korean government or the Ministry of Education.

13. Foreign exchange students entering Korea must purchase insurance for studying abroad or traveling abroad. The period of insurance coverage must be the same as or longer than the period of staying in Korea. Students can purchase insurance in their home countries or insurance offered by Kyonggi University. If you are already insured, you must submit a certificate of insurance at the request of the Office of International Affairs at Kyonggi University. (Submit in January or February 2021)

14. If it is difficult to participate in the 2021 Fall semester exchange student program due to the COVID-19, you can change your plan to the 2022 Spring semester exchange student program or give up the exchange student program itself. The cancellation deadline is January 17 2021. The cancellation or change on your study plan only can be accepted by the request of the coordinator at each university.

15. Foreign exchange students will always wear masks and often wash their hands during their stay in Korea to prevent COVID-19 infection, and refrain from visiting crowded areas.

16. Foreign exchange students must obtain the approval from the coordinator at Kyonggi University before traveling abroad or to the other cities in Korea. After finishing traveling abroad, students must complete 15 days of self-isolation regardless of whether they are infected or not. Also, all disadvantages resulting from not obtaining the approval before traveling must be their responsibility.

I, my guardian, and the coordinator at my home university totally agree to the above
and agree not to raise any objections regarding the above in the future.
