UNIVERSIDAD DE MÁLAGA

Innovation, dynamism, and internationalisation are the principles that UMA stands for

UNIVERSITY OF MALAGA

Situated in a privileged geographical location, the University of Málaga is a young, growing university known for its quality teaching, cutting-edge research and knowledge transfer.

The University of Málaga is highly committed to contributing to social progress through scientific development and innovation.

Founded in 1972, it has more than 35.000 students, 58 Bachelor's Programmes, 53 Master's Programmes and 278 research groups.

FACULTY OF EDUCATION

The Faculty of Educational Sciences provides courses aimed at prospective teachers and other professionals in the field of education. It was founded in 1991.

The Faculty of Educational Sciences is located in the Teatinos Campus. It offers four Bachelor's Degree Courses (Early Childhood Education, Primary Education, Social Education and Pedagogy), six Master's Degree Courses and a PhD programme. About 4000 student study here.

General information about subjects

FIRST YEAR

103 HISTORY OF SCHOOLING 6 ECTS

This subject offers an overview of the development of Spanish Primary education from 1838 (when it became compulsory) to the present day within a European context. The programme addresses important educational questions, firstly, by examining the ideas, individuals, and institutions of the past to determine their influence on their own time; and, secondly, by bringing historical knowledge and perspectives to bear on current educational issues. Education Acts and school practices are also examined in this subject.

1º Semester

uma.es

106 GENERAL DIDACTICS 9 ECTS

General Didactics is a core education subject that addresses some of the essential theoretical-practical foundations of the professional development of prospective Primary Education teachers such as general approaches to didactics and teacher identity construction.

2º Semester

Art and music are key to the integral and cognitive development of students during learning...

102 MUSIC EDUCATION

6 ECTS

1º Semester

Recent research in neuroscience suggests that interpreting music is the human activity that activates the greatest number of brain areas. Additionally, it has been proved that the ideal window of opportunity for learning music is the early childhood and primary education stage.

Activities in this subject include acting, delivering musical performances, attending musical productions or visiting music museums.

101 ARTISTIC AND VISUAL EDUCATION

6 ECTS

This subject offers a journey through the process of graphic development in childhood, an approach to the artistic procedures in the classroom and a critical and reflective approach to arts education from a contemporary perspective that highlights the power of the image as educational tool.

1º Semester

Society, Family and School...

104 SOCIOLOGY OF EDUCATION

6 ECTS

1º Semester

This subject introduces the students to psycho-social and ethical issues as well as to basic sociological concepts and processes, and social institutions that impinge on education.

105 THEORY OF EDUCATION 6 ECTS

1º Semester

In this subject some of the most important issues of today's society that affect the family and school education are analysed and critically appraised: social and educational impact of audiovisual languages, changes in gender relations and intergenerational, multicultural and intercultural discrimination, as well as social inclusion and sustainable development.
