

The new slogan raised by Kyungsung University is to establish a renaissance in education and the renaissance of Kyungsung.

This slogan is not a splendid text to make Kyungsung University beautified but it is the basic direction and main concept to achieve. In other words, this is merely not a ridiculous slogan but it is our commitment to ensure that education is based on true study.

## Message from the Chairrman

### **We will make a university which challenges the future**

We will make a university willing to challenge the future based on a foundation philosophy of Christianideas of love and service. Our University has seen many developments and changes over the years thanks to the unwavering determination and endless efforts of its members, along with help from the local community and other outside sources. Though we are proud of our 50 year history we are more interested in facing the challenges of the future than in talking about our past achievements. As the information-based society of the future dawns, universities must strive to produce creative academic research facilities while at the same time cultivate future-oriented individuals who can compete in today's workforce. Kyungsung University has foreseen the rapid changes of the modern society. Our university provides a new and lasting education system in an attempt to escape from the existing paradigm that has become common and monotonous an idea encompassed by our slogan accentvating a renaissance of education and Kyungsung University. Education at Kyungsung is aimed at nurturing qualified competent, professionally-minded people by reinforcing sensibility and leadership. The quality of a university is not determined by its size alone. The will and efforts of the school members and faculty make the school stand out among others. We must recognize the truth as we do our best to create a quality university.

Chairman Dae Sung Kim

## Message from the President

**We will vigorously grow into a prestigious university creating the path to the future.**

Recent rapid changes surrounding the universities are calling for constant transformation. In order to overcome the waves of change into preparing a new leap forward, all members of Kyungsung University are willing to become future-oriented once again with a firm determination and sensible selection.

Our university will certainly provide a student-centered education by offering a pleasant, enjoyable environment for study. Moreover, we are determined to continually expand newly-emerging academic fields to turn into a distinguished university. The university also plans to work hard on education-focused research to achieve quality improvements in education. In order to secure international competitiveness, we will make utmost efforts to realize a globalized university by developing sense of and experience with of international awareness of our students. On top of this, we are confident that we will build an eco-friendly urban campus.

Kyungsung University now plans to cope positively with a huge wave of changes and makes the most use of our potential and strength. With our open-minded attitudes towards harmony and creation, we will take forceful steps in becoming the most prestigious private university in Busan by opening the door to the future. Therefore, I sincerely hope that all of us can fly high in the sky like an eagle, the symbol of Kyungsung University.

President Soo Geun Song

## 1955

- 5/30/1955 Establishment of Kyungnam Teachers's College, Founder: The Late Rev. Kim Gil-Chang
- 6/20/1955 Kyungnam Teachers's College Opened
- 1/28/1963 School name changed to Hansung Womens's Technical College
- 1/10/1979 School name changed to Pusan Industrial University(Implementation of 4-year college system)

## 1980

- 2/ 4/1980 Sister-university relationship established with the Chinese Cultural University in Taiwan
- 11/ 25/1981 Graduate School of Trade established. (Name later changed to Graduate School of International Management)
- 12/ 5/1981 Sister-university relationship established with Fukuoka Institute of Technology in Japan.
- 9/ 8/1983 School became a general university with 5 separate colleges.  
(Liberal Arts, Law and Politics, Commerce and Economics, Science and Engineering, and Arts)
- 10/29/1983 Graduate School established
- 11/27/1984 Doctoral programs approved for Graduate School. Founding of the Graduate School of Industrial Engineering.
- 5/22/1986 Sister-university relationship established with Eastern Washington University in the United States.
- 11/ 9/1987 Graduate School of Education established.
- 5/ 1/1988 School name changed to Kyungsung University

## 1990

- 10/21/1994 Graduate School of Information Policy established.
- 10/22/1997 Opening of the Multimedia and Information Building. The Ultra-High Speed Information Network (ATM) began operation.
- 10/25/1997 Graduate School of Clinical Pharmacology established.
- 11/ 5/1997 School of Theology established and integrated with the Pusan School of Theology.
- 11/11/1997 Designated as a Multimedia Specialized University by the Ministry of Education.
- 8/19/1998 College of Multimedia established.
- 10/28/1998 Nationally recognized as a Multimedia Specialized University by the Ministry of Education.
- 11/1999 In the University General Evaluation by the Ministry of Education, 6 out of 7 areas were designated as "Outstanding."

## 2000

- 12/2000 Nationally selected as "the Most Outstanding Specialized University (Multimedia)" for the fourth year in a row.
- 2/13/2001 Establishment of the Professional Graduate School of Digital Design
- 4/2001 University expands to 9 undergraduate colleges encompassing 16 different faculties and 16 departments (Five faculties and four departments offer classes through the Evening College) and seven Graduate Schools.
- 10/15/2001 Multi-purpose Building 27 Ground Breaking Ceremony
- 11/ 1/2002 Digital Design Graduate School officially recognized as a Maya Education Center
- 11/18/2002 "Culture Technology Park Building-Up Project" selected as a recipient of financial support for the Development of Regional Universities by the Ministry of Education & Human Resources.
- 12/10/2002 Dr. Kim, Dae-Seong inaugurated as the 9th Chairman of the Board of Trustees of Hansung Foundation
- 1/17/2003 Established the CT Park Building-Up Group
- 2/17/2003 Designated "Outstanding University" by the Korean Education Development Institute's Teachers' Curriculum Evaluation.
- 7/22/2003 Selected to receive Regional University Assistance Fund by the ministry of Education and Human Resources.
- 6/16/2004 Selected as a Training Group for visual imaging and CT Human Resources for the "Nuri" project in June, 2004 by the Ministry of Education and Human Resources.
- 7/2004 University currently composed of 9 undergraduate colleges, 7 graduate schools, 9 affiliated organizations, and 7 research institutes.
- 1/21/2005 In the University General Evaluation by the Ministry of Education, 3 areas are designated as "Outstanding".
- 9/2005 University currently composed of 9 undergraduate colleges, 7 graduate schools, 9 affiliated organizations, and 7 research institutes.
- 8/31/2005 Inauguration of the 9th President, Nah, Joong Shik.
- 22/7/2003 Selected to receive Regional University Assistance Fund by the Ministry of Education and Human Resources.
- 16/6/2004 Selected as a Training Group for Visual Imaging and CT Human Resources for the "Nuri" Project in June, 2004 by he Ministry of Education and Human Resources.
- 21/1/2005 In the University General Evaluation by the Ministry of Education, 3 areas are designated as "Outstanding"
- 26/4/2006 Designated, international specialists education team for Brain Korea 21 (BK21) project.
- 23/5/2008 「Senior Easy Life」 designated as RIS Project (Regional Innovation System) by the Ministry of Knowledge Economy
- 20/4/2009 Designated as a Supporting University for Educational Reinforcing Program in 2009 by the Ministry of Education, Science & Technology.
- 3/2011 University currently composed of 10 undergraduate colleges, 7 graduate schools, 7 affiliated organizations, and 7 affiliated research institutes.

## **Through half a century, Kyungsung University's development still continues.**

The university was established by the late Reverend Dr. Kim Gil-Chang, a pioneer of Christianity in Korea. The university was originally called Kyungnam Teacher's College was established in 1955 under the ideals of Christian love and service. In 1979 the school was re-organized and renamed Pusan Industrial University. At the time of the founding of Pusan Industrial University, the General Construction Committee of the school began work on expanding and improving the quality of the university's facilities. As a result, the university received official sanctioning as a general university in September, 1983. The name of the university was changed to Kyungsung University in 1988 during the process of becoming an international university which can fulfill the needs of today's society.

The university has 10 undergraduate colleges (Liberal Arts, Law and Politics, Commerce and Economics, Science, Engineering, Pharmacy, Arts, Theology, Multimedia, and Chinese) in 2011 encompassing 7 different faculties and 54 departments (In 2011, the maximum freshmen enrollment will be 3,120 students).

There are seven graduate schools (General, International Management, Multimedia, Education, Social Welfare, Clinical Pharmacy, and Digital Design). In addition, seven affiliated organizations and seven affiliated research institutes have been established to aid teaching and research. Kyungsung University's 700 employees and over 13,000 students are all working together to achieve the school's educational goals.

## **Kyungsung University on the move into the future.**

Since the university was designated as a supporting university for educational reinforcing program by the Ministry of Education, Science & Technology, its progress will be improved by focusing on students through many other successful projects such as adhering education system to make students dream come true.

## Government-funding Programs

### ▶ Nuri Digital Image-CT Human Resources Training Program

Kyungsoong University was selected as a Training Group for Visual Image and CT Human Resources for the "Nuri" project by the Ministry of Education and Human Resources. The departments such as multimedia, CT, visual CT are participating in the project.

### ▶ Universal Design Foundation Establishment Project

Kyungsoong University was selected to receive intensive support by the Korea Institute of Design Promotion (KIDP). The project to establish the foundation of universal design in the design section started as part of the projects of the industrial technology foundation in the year 2004.

### ▶ Local Community Culture Research Center

As our university was selected for intensive support of the local-culture research center by the Korea Culture & Content Agency, the city of Busan will have an opportunity to be promoted in a new Hanryu cultural contents plan and production including animation through drama and music records.

### ▶ Organic LEC Development Program

Kyungsoong University was supported by the national treasury from Ministry of Commerce, Industry and Energy valued at 2.4 Billion KRW for three years from 2004 to 2007 and it set the goal for Busan city to be fostered as an industrial mecca of organic LED components and materials through the development of core technology of an organic LED sector; the development of human resources for the research and the establishment of R & D information network at home and abroad.

### ▶ BK21 Digital Convergence Contents Program

International specialists development project team for digital convergence contents applied by the Graduate School of Digital Design as a core sector was selected for the 2nd phase BK21 (Brain Korea) which aims for the promotion of research-oriented universities and the improvement of qualified students who can compete at an international level.

### ▶ Designated as RIS Conducting Institute

Designated as RIS Conducting Institute

### ▶ Designated for 「A Manpower Development Program for Energy & Resources」 (Task 2)

### ▶ 2009 Designated as a Supporting University for Educational Reinforcing Program.

More act

**Kyungsung University's  
door is opening to the world.**

Kyung Sung University is actively adapting to the wave of internationalization, globalization, and liberalization that is opening and changing the educational environment of the world. In this respect, we are working toward the globalization process that brings Kyung Sung University into the international educational community, which is appropriate for the needs of our school.

Kyung Sung University is moving into the new era of openness by forming practical and productive international exchange programs with universities in the United States, Australia, Japan, China, Indonesia, and Taiwan. The Kyung Sung Language School was established in Jakarta in July 2005 in order to help Indonesian students enter Kyung Sung University by providing them with a Korean language training program.

◎ International Exchange Programs during the last 4 years ( from 2006 to present )

School	Date	Type of Exchange
University of Queensland, Australia	Jan. 06, 2006	Short-term overseas language training program, 37 students sent for 5 weeks
Chinese Cultural University, Taiwan	Feb. 18, 2006	3 exchange students sent for 1 year
Zhengzhou University, China	Feb. 23, 2006	Overseas language training program, 76 students sent for 18 weeks
Seinan Gakuin University, Japan	Apr. 01, 2006	2 exchange students sent for 1 year
Seinan Gakuin University, Japan	Jul. 02, 2006	Short-term overseas language training program, 9 students sent for 4 weeks
University of Queensland, Australia	Jul. 21, 2006	Short-term overseas language training program, 26 students sent for 5 weeks
National Chengchi University, Taiwan	Sept. 01, 2006	Overseas language training program, 1 students(full-scholarship) sent for 1 year
University of Bahcesehir, Turkey	Sept. 16, 2006	3 exchange students sent for 6 months
University of Queensland, Australia	Jan. 05, 2007	Short-term overseas language training program, 41 students sent for 5 weeks
Qingdao University, China	June. 13, 2007	Dean of International Office and delegates visit KU, meeting on exchange program
Shandong University, China	Aug. 08, 2007	Vice Presidents and delegates visit KU, meeting on future partnerships between KU and Shandong University
Delhi University, India	Nov. 16, 2007	Head professor, Department of East Asian Studies visit KU, meeting on partnerships between KU and DU
Northern East University	Dec. 15, 2007	President of KU visit NEU, sign on academic exchange agreement
Zhengzhou University, China	Feb. 15, 2008	Overseas Language Program
Qingdao University, China	Mar. 19, 2008	Dean of External Affairs visit Qingdao University, Meeting on exchange program
University of Business and Finance Switzerland, Switzerland	Mar. 25, 2008	President of UBFS visit KU, Meeting on future partnerships between KU and UBFS
Valley Forge Christian College	Apr. 17, 2008	President of VFCC visit KU, Meeting on future partnerships between VFCC and KU
Bahcesehir Science High School, Turkey	Jul. 08, 2008	KU invites Fifteen(15) students from BSHS to Korean Cultural Experience and IT
Apellaid University in Australia	Sept. 05, 2009	Signed the agreement for exchanging students and language course
University of the Philippines and De La Salle University	Nov. 25, 2009	Signed the agreement for mutual exchange
East China Normal University	Nov. 02, 2009	Signed the agreement for dual degree program
National University-HCM	Jan. 08, 2010	Signed the agreement for exchanging professors and students

The pride of Kyungsung University is  
our outstanding faculty equipped  
with theory and practice.

Kyungsung University professors are younger and more capable than the professors at many other universities. Faculty members from each department have been recognized for their outstanding qualifications, research, and social service. In addition to being awarded a grade of "Outstanding" on the General University Evaluation, maintaining a ranking of "Outstanding on the national level" for all published scientific research papers. Kyungsung University has the highest number of Outstanding Scientific Theses per department in Korea and the largest group of professors participating in the University Educational Contents Development Project. Not only are there faculty members producing research papers, there is also a professor who has made a movie which has generated much interest. Faculty members have a broad range of experience in the media, research, and various industries. They can unite their real experience with theory in the classroom to give their teaching the feel of the real world.

## **Kyungsung University's active alumni community is another source of our strength.**

Kyungsung University alumni are making a name for themselves in all aspects of society and bringing honor to the school. Cho Un-Ho, the president of EolSsu Co., Ltd (Accounting '81) was chosen as one of the 18 leaders of the next Asian generation by the World Economic Forum. In the entertainment area, Cho Jae-hyun (Drama '84) has become a movie star with his refined acting in the movie "Bad Man" and on television in the drama "Piano". Jang Won-Sahm, pitcher, Beijing 2008 Olympic Games Baseball Gold Medal Winner. Many Kyungsung University alumni are attracting attention throughout society for their achievements in education, business, sports, entertainment, and the media.

**A** university moving towards the future!  
You moving towards your dreams!

**In Kyungsung University, full of passion for.**

## Scholarships

### Campus Scholarships

Entrance Scholarship(Top in each Division, Top in each College, Entrance Scholarship in each Department), Dance Performance Scholarship, Literary Scholarship, Self-support Scholarship, Honors Scholarship, Korean Government Exam Success Scholarship, Scholarship for the Family Members of National Meritorious Recognition, Scholarship for Kyungsung Teaching Staff's Children, Scholarship for Corporate Related Teaching Staff's Children, Sports Specialty Scholarship, Service Scholarship, MCC Scholarship, Scholarship for Two-Student Registration, Scholarship for National Living Support Recipient, Labor Scholarship, ROTC Scholarship, Academic Scholarship, TOEIC Scholarship, School Reputation Enhancement Scholarship, Study Aboard Scholarship, Hana Scholarship.

### External Scholarship

Korean Research Foundation, Asan Social Welfare Foundation, Wonpa Culture Scholarship Fund, Jeongsu Scholarship, Ministry of national Defense, Korea Air Force Headquarters, Busan metropolitan City, KT-IT master, Korean Electricity Association, Scholarship Fund Foundation of Korean Confederations of Trade Unions, Busan Hangdo Rotary Club, Busan Jin-gu Scholarship Fund, Alumni Association of Teaching Staff, Alumni Association, Namchon Scholarship Fund, Gohwa Scholarship Fund, Ilsan Scholarship Fund, Sinwoohoi, Bunpo Scholarship Fund, SanHo co, Sogang Scholarship, etc.

## Student Service

### **Kyungsung University supports comfortable student campus life.**

Kyungsung University's student welfare facilities consist of student convenience facilities and general campus facilities. Student convenience facilities include the departmental meeting rooms, men's and women's lounge areas in each college, club meeting rooms, and student council offices. Campus facilities include student and faculty cafeterias, snack bar, general store, barbershop, beauty parlor, copy center, photo shop, optical center, computer store, travel agency, coffee shop, bank, and post office.

The student convenience facilities provide an open and free environment for academic and extra-curricular activities. Operation and maintenance of the convenience facilities is done by the students themselves and helps enhance school pride and culture. The general campus facilities provide quality goods and services at modest prices. Items needed for campus life are readily available. These facilities are sensitive to the changing needs of the Kyungsung University community. Profits are put into a Welfare Fund that is available to Kyungsung University members in time of need.

## Campus Life

### **Only pleasant things happen at Kyungsung University!**

Throughout the years many kinds of academic and artistic festivals are held to enhance school spirit and to further the ideals of the university. The Daedong Festival is held each year around May 30, the anniversary of the founding of Kyungsung University. Each department also holds its own "Fall Festival" during the fall semester. Various volunteer service activities are carried out by student groups including volunteer agricultural service three times every year during the spring, summer, and fall.

Student club activities are especially dynamic. There are 78 different student clubs with over 4,500 participating students. Types of student clubs range from artistic performances, volunteer service groups, and academic clubs, as well as religious and athletic groups. These student clubs also have festivals related to the different cultural and artistic interests of each club.

## U-Square

The U-square based in the central library holds passion and challenge to make dreams come true, offering various kinds of services such as information, academic study and relaxation. There is a specialized zone to support job-seeking students, as well as group study and seminar. In addition, DVD corners are available for couples and friends, and can search for a variety of academic data, refresh themselves at the information search and web surfacing corners.

## Sports Center

The Sports Center is equipped with a swimming pool, fitness center, squash court and aerobic room. The swimming pool is clean and with national level swimming coaches who provide classes. The fitness center is popular not only among undergraduates but also with the community as it is furnished with state-of-the art machines. The Sports Center in which female and male students improve their health together while listening to cheerful music is where Kyungsung University's powerful energy is released.

## Nuri Dormitory

The Nuri Student Living House, Kyungsung University's dormitory, was built to attract excellent students who are from the suburbs and to correspond with the new image of the university of a high-quality institution. The 15-story Nuri Student Living House can accommodate around 660 students in 330 rooms. Each room can accommodate two students and is designed with a deluxe bathroom, HVAC and refrigerator so that students can enjoy the most pleasant and comfortable campus life. As subsidiary facilities, there are a fitness center, a table tennis room, laundry rooms for men and women, dining room holding up to 400 people, a convenient store, a post office, a student lounge, an internet cafe, a party room, a students' autonomy office, a language lecture room, a conference room and an assembly hall. Besides, rest rooms, meditation rooms and reading rooms are provided on every third floor respectively.

Also, on the 15th floor, a guest room designed for foreign visitors not only attracts foreign students, but also contributes to revitalization of international interchange in the future.

## Affiliated Organizations

**Kyungsung University  
educates qualified students  
who create their future.**

Seven annexes including the main library serve as a foundation for each student to be a sound person, as well as creative practical.

### ⊙ Central Library

The central library collects, arranges and preserve various domestic and international data and information which are needed for scientific research and study. It functions as a body to help Kyungsung University students achieve their educational objects effectively. It includes the Office of Academic Information Support and Office of Academic Information Services.

### ⊙ Information & Computing Center

This center plays a role in managing the university's information system, which is basic to achieve the university's educational purpose. The institute is responsible for the development and promotion of the information-oriented policy and the support of other computerization required-tasks. In March 2006, the Center for Teaching & Learning was established.

### ◎ School of Continuing Education

The School of Continuing Education supports social education to promote self-development and better qualifications. The center operates the Social Education Department that practices lifelong education in the community. The other departments under the center are the Language Education Department that endeavors to help globally qualified students and the Sports Center for the students and community residents.

### ◎ Career Development & Employment Department

The Career Development & Employment Department Office assists students' course development and their adaptation to society by problem-solving skills during campus life and classes. The department provides various information and data for employment as well as for avocations and consulting sessions while conducting researches to acquire information in related fields of study.

### ◎ Bird Museum

The Bird Museum exhibits storks, a natural treasure, and stuffed birds that once inhabited Korea but are now extinct. The museum also carries other valuable specimens of 270 birds, 70 eggs and some bird nests found in Korea.

### ◎ University Museum

The University Museum unearths, exhibits and researches significant data needed for restoring the history of 'the Kaya' culture and has contributed to its history and succession and preservation of traditional culture. It also collects and exhibits Korean traditional folk materials.

### ◎ Multimedia Communication Center

The Multimedia Communication Center (MCC) promotes close communication between study members through media activities supporting multi-media related creative activities by making various media centralized along with the cutting edge system.

**The place where hopes exist and dreams grow.**

## Culture & Exhibition Paradise

### Cultural Performance Facilities

The cultural performance facilities at Kyung Sung University are equipped with state of the art sound and lighting systems as well as multimedia presentation equipment. Since Opening in September 1983, the 499 seat Concert Hall has played an important role in the local culture community. The Small Theater and Small Lecture Hall, which opened with the Multimedia and Information Building in November 1997, are used not only for classes and lectures, but also for a variety of performances, movies, and seminars.

### Exhibition Facilities

The exhibition facilities of Kyungsoong University consist of the Exhibition Hall of Wild Birds, the Art Gallery, and the University Museum. The Exhibition Hall of Wild Birds is located on the B1 level of the Multimedia and Information Building. There are over 1000 specimens representing 270 different species of bird, most of which are native to Korea. Specimens of eggs and nests are also preserved here, along with many rare documents. It has become a popular destination for many students on nature field trips. The Art Gallery was one of the first university museums in the country to be registered as a first-class art museum. It is equipped with the latest lighting facilities. Besides providing a space for artistic research and production, the Art Gallery also has many special exhibitions. The University Museum opened in March 1972 and serves as a research center for Kaya culture. In the exhibition room one can get a feeling for the roots of Korean culture by viewing objects dating from the Stone Age through the Chosun Dynasty.

# We handle the change of the world promptly.

Kyungsung University currently is comprised of 10 undergraduate colleges (Liberal Arts, Law and Politics, Commerce and Economics, Science, Engineering, Pharmacy, Arts, Theology, Multimedia, and Chinese) with 7 departments and 54 majors (In 2011, the maximum freshmen enrollment will be 3,120 students).

## Kyungsung's...

### Introduction of Colleges

- College of Liberal Arts
- College of Law and Political Science
- College of Commerce and Economics
- College of Science
- College of Engineering
- College of Pharmacy
- College of Arts
- College of Theology
- College of Multimedia
- College of Chinese Studies

# College of Liberal Arts

- Department of Korean Language and Literature
- Department of English Language and Literature
- Department of German Studies
- Department of French Studies

## Introduction

The College of Liberal Arts plays a central role in providing a humanities based education that is essential for maintaining a healthy and vibrant society. To this end it constantly improves teaching methods with a view to new era in education. The curriculum is designed to include various cultural elements and maintain a strong sense of Korean self-identity. The emphasis on humanities helps students develop their creativity, individual capabilities, level of consciousness, and thinking in a versatile manner.

## Departments and Majors

### Department of Korean Language and Literature

The Department of Korean Language and Literature teaches both Korean language and literature. Since language and literature are not fixed but change depending on time and location, students need to understand various historical opinions and views. The department aims to improve creative thinking and writings, not just an understanding and embracing of Korean language and literature. The curriculum is divided into Korean linguistics and Korean literature. Through recent linguistic theories, students study vocabulary needed in everyday life, as well as cultural phenomena reflected by it.

### Department of English Language and Literature

The main educational objective of the English department is mastering the four skills (listening, reading, speaking & writing) of English. To achieve this goal, students learn the structural features and developmental processes of English, matched with practical applications of these skills outside the classroom. Apart from analyzing the linguistic aspects of English, students will also read and analyze both British and American literature. Students will have a genuine chance to experience the essence of British and American culture as well as enhance their linguistic ability. Through this approach, the English Department believes that students will appreciate the value of the English language not only as a tool for international communication, but also as a significant cultural phenomenon in the world today. The ultimate goal is to educate students to be globalized elites with a balanced world perspective.

### Department of German Studies

Germany is one of the major economic and industrial powers in the EU and the world. Therefore, research and an understanding of Germany are required to meet various changes in international affairs. The Department of German Studies aims at cultivating people of ability with a strong command of practical German who are well informed of German speaking areas like Germany, Austria and Switzerland. This is aided by excellent professors, renovated curricula and the newest educational facilities.

### Department of French Studies

The educational goal of the Department of French Studies is the nurturing of specialists well versed in French studies. Effort is concentrated on practical French education. Research is performed in various domains for the comprehension of French studies: politics, economy, society, geography, history, culture and art. Therefore, not only does the department offer a practical dimension for the nurturing of specialists on French studies, but also new perspectives and ideals for the future as well.

- Department of Japanese Language & Literature
- Department of Korean Literature in Classical Chinese
- Department of History
- Department of Philosophy
- Department of Library and Information Science
- Department of Education
- Department of Early Childhood Education
- Department of Ethics Education

### **Department of Japanese Language & Literature**

The Department of Japanese Language & Literature offers a curriculum focused on improving social and communication skills. It aims to help students acquire an excellent command of Japanese. Since 1980, our department has produced approximately 800 graduates who have won nationwide reputations due to success in the workplace.

### **Department of Korean Literature in Classical Chinese**

Students learn Korean classical literature written in Chinese characters. By teaching Chinese characters and the grammar of Korean written in Chinese characters, the department helps students to understand Korean history, allowing them to be confident and competent and thus able to contribute to the cultural development of Korean society.

### **Department of History**

Through an academic approach to Korean, East Asian and Western histories, the Department of History enables students to realize the position of modern society in the course of human history. The departments aim at fostering national awareness as much as global citizenship and developing knowledge and adaptability suitable for the period of globalization. In addition, a wide-ranging understanding of historical fields (politics, society, economy, and culture.) extends the intellectual horizon, and logical research in historical studies develops the power of reasonable thinking. Furthermore, field investigations of historical sites develop pragmatic attitudes connecting theory and practice so as to ultimately build up abilities and virtue necessary for today's world.

### **Department of Philosophy**

Philosophy pursues a profound and comprehensive understanding of humanity and the world. It aims to help students develop logical and critical thinking skills and develops the ability to look at the problems of humanity with the comprehensive perspectives in social and historical contexts. Each member of the faculty is well versed in their major field of study. They offer students a perspective on daily living through unique lectures that cannot be experienced in other departments. The festival focuses on the presentation of papers, academic discussion, and other activities that give full attention to the students' intellectual and creative ability attained in the classroom.

### **Department of Library and Information Science**

The Department of Library & Information Science deals with searching, collecting, organizing, and supplying the knowledge and information which are produced and circulated in analogue and digital form. It also studies the theories and technologies according to education, reference service, and the reading activities for improving the usefulness of knowledge and information. Through these studies, the department has produced a number of top librarians and information specialists who will play important roles in the knowledge & information society.

### **Department of Education**

Preparing effective teachers, leaders, and researchers; conducting and applying research; and offering accessible local and global outreach. The Department of Education at Kyung Sung University emphasizes field-based study in educational settings where social, economic, and political pressures interact to help shape policies and practices. The importance of the social and psychological context of learning and an overarching interest in field-based teaching and research are common to faculty members and staff.

### **Department of Early Childhood Education**

The Department of Early Childhood Education provides a comprehensive teacher training program dealing with early childhood related issues, theories, and practices to educate prospective teachers for early childhood organizations and researchers for the future. The curriculum includes a special program, in addition to the regular program, which is a weekly on-site observation of kindergartens and child care centers every semester for sophomore, junior, and senior students. In May, senior students participate in 4-weeks of teacher training in affiliated educational settings to make a connection between theory and practice. The total number of enrolled students is approximately 150, including 30 regularly-admitted students, students with special admission and double major students. After graduation, most work as teachers at kindergartens and day care centers. Graduate programs, consisting of master's (both in-service and pre-service) and doctorate programs, are available to nurture and develop future leaders in early childhood education and academic research.

### **Department of Ethics Education**

As part of the College of Education, this department aims to develop teachers of ethics in middle and high school. The instruction of character, morality and citizenship to students from 7th to 12th grade is a sacred trust which ensures the future of our country. To meet these goals, this department nurtures passionate as well as intelligent and skillful teachers. The curriculum of this department is composed of four parts: 1. the understanding of Korean, Eastern and Western moral theories; 2. the inter-disciplinary study of human, society, state and nature; 3. the understanding of moral education theories; and 4. the practical training of moral education.

# College of Law and Politics

- Department of Law
- Department of  
Public Administration
- Department of  
Political Science
- Department of Social Welfare

## Introduction

The College of Law and Politics aims at providing graduates who will be able to contribute to Korea's social development based on broad education and meaningful social research. It Strives to educate qualified individuals who can play major roles in 21st Century society. It is dedicated to providing a practical education that emphasizes all aspects of learning. Students have internships in real working environments and experts from outside the university are often invited as guest lecturers. In addition, lecture halls and classrooms utilize state of the art computer and multimedia educational facilities.

### Department of Law

Law refers to a system of rules and guidelines, usually enforced through a set of institutions. It shapes politics, economics and society in numerous ways and serves as a social mediator of relations between people. Laws change continuously, in accordance with people's thinking and the circumstances of society. Laws have seen dramatic changes in recent years with the advent of globalization. Jurisprudence aims to understand social change, legalize it and manage society through legislation. The KSU Department of Law aims to produce well-

## Departments and Majors

trained leaders who will solve legal issues in Korean society. In order to achieve these goals, the Department of Law offers a curriculum based on a general study of humanities, social sciences and specialized legal knowledge. In addition, the Department of Law seeks to train global legal practitioners who will have the insight and perspective to thrive in the international arena and provide innovative solutions to the issues our world faces.

### Department of Public Administration

It is now more than one hundred years since the science of public administration in the modern sense was established as one of the most necessary and useful disciplines of the social sciences. The Department of Public Administration aims at training competent administrators capable of actively coping with the tendencies of globalization, information and localization, which are current trends of the world. We especially keep in mind that educational content should include relevant theories and practices, helping our graduates make rational decisions and judgments both in government agencies and private enterprises. Our department is composed of excellent professors who teach and guide students, heart and soul, allowing them to develop their capabilities.

### Department of Political Science

Kyungsoong's Department of Political science is one of the leading centers for teaching and research in political science. We offer an unusual combination of depth and breadth in the major subject areas of political science, covering not only the traditional subfields of Korean politics, comparative politics, international relations, and political theory but supplementing those subfields with very substantial strength in areas such as formal theory, methods, organizations and public policy, political behavior, and public law, as well as the politics of every major region on the globe. Our faculty and students play key roles in numerous centers and organizations across Kyungsoong's campus whose missions bear on topics of interest to political scientists.

### Department of Social Welfare

Social welfare is an academic field focused on a happy life and constructing welfare for society. The Department of Social Welfare in a university is the place where areas of social welfare are researched, learned, and practiced. In modern society, various social problems are intermingled so complicatedly that they cannot be solved by only one person. Institutional, professional, communal efforts are required for realizing the purpose of social welfare. For that reason, the department aims to train human service professionals who will prevent and solve various social problems of modern society, and contribute to realizing the welfare of society. Based on the fundamental knowledge of various social science fields, the main contents of the educational curriculum are the method of professional social welfare practice, social welfare policy and administration, theory and practice of program development among others that all are aimed at enhancing the social functioning of the individual, family, group, organization, community, and country. The contents are based on the fundamental knowledge of various social sciences. The program consists of professional social welfare practical methods, social welfare policy and administration, the theory regarding program development and actual training all for the improvement of the social functions of the individual, the group, the organization and the community.

# College of Commerce Economics

- School of Economics, Finance, and Logistics
  - Major in Economics
  - Major in Logistics
  - Major in Finance
- School of Business Administration
  - Major in Business Administration
- Department of International Trade & Commerce
- Department of Accounting
- Department of Management Information Systems
- Department of Hotel & Tourism Management
- Department of Food Service Management

## Introduction

The educational goal of the College of Commerce and Economics is to provide people who will be global leaders of industry and commerce in the 21st century. Currently, there are over 40 full-time professors in this college who give their students a high level of expertise through the teaching of a combination of theory and practical applications which parallels that found in many American schools of management.

## Departments and Majors

### School of Economics, Finance, and Logistics

The School of Economics, Finance and Logistics aims to develop core academic and practical competences in strategic industries of southeastern Korea, a region where Busan is at the center. The School has a number of unique and excellent academic resources which include, among others, leading scholars as faculty members, a computer and smart lab, and a far-reaching network of colleagues. The School will advance as a second-to-none academic institution in southeastern Korea.

#### Major in Economics

An understanding of economics is a vital component of a liberal arts education and a necessity for anyone interested in such areas as business, environmental policy, welfare reform, international trade and finance, or globalization. The Major in Economics program is designed to acquaint students with a broad range of issues studied by economists and the tools they use. A Major in Economics serves as the fundamental cornerstone of our school. Concepts and theories, as well as practices acquired through the courses, extend to the other two majors in the School.

#### Major in Logistics

The Major in Logistics takes an inter-disciplinary approach to learn the diverse field of logistics and operations management,

spanning shipping, transportation, warehousing and all industries whose success depends on the effective and efficient management of the flow of materials, information and financial resources. In doing so, it strives to be a key driver in Busan's pursuit to become an international logistics hub par excellence. The faculty creates highly effective logistics managers and leaders through the development of contemporary educational materials and the use of innovative and teaching methods.

#### Major in Finance

The Major in Finance prepares students for exciting and challenging careers in all areas of finance with real-world curriculum, a wide range of elective courses, and impressive networking opportunities. Students become experts in the concepts, tools, and technologies required to succeed in their future careers. Specific topics include Brokerage, Credit Analysis, Financial Analysis, Portfolio Management, International Banking, Trading, Security Analysis, International Investments, and International Financial Analysis.

### School of Business Administration

The Department of Business Administration aims to nurture creative and challenging professional administrators and administrative data managers as educators of theoretical and

practical management methods of business administration that could be applied to all organizations such as enterprise, governmental bodies and non-profit organizations in the future. To achieve this, the Department of Business Administration actively recruits excellent, world-class, young teaching staff and manages a multiple diploma policy through which it is possible to gain a business administration degree from both Pukyong National University and a foreign university.

### Department of International Trade & Commerce

Our department aims at educating foreign business experts to be leaders in the age of borderless and limitless competition. To achieve this goal, students need theoretical study as well as the development of executive activity through practical training. Students also need to acquire of a global sense through various foreign experiences and a systematic system that connects knowledge to employment. On the basis of this acquisition, our department currently uses a curriculum that includes various examples of foreign regional research and foreign experience programs. This provides an opportunity to develop executive ability with experience of actual trade transaction through the "Global Trade Experts Incubating Program (GTEP)". Student are nurtured as valuable human resource assets as foreign business specialists through the "Global Internship Program".

### Department of Accounting

The goal of the Accounting Department is to educate specialists to become CEOs and investors by applying quality information in making economic decisions. The department strives to educate accounting specialists who are able to meet the demands of high tech global work places.

### Department of Management Information Systems

The uncertainty of today's business environment, the fragmentation of various customers, companies with large amounts of data generated internally and externally, companies are making difficult decisions. For this reason, the modern corporate organization is engaged in leveraging the Internet and information technology through the systematic and scientific approach to management activities. Given modern corporate management, the Department of Management Information uses essential tools such as the Internet and information technology concepts as well as practical methods, case studies are systematically discussed. To be much used in modern

businesses, especially ERP, CRM, SCM-related focuses on various information technology tools, the systematic management of vast amounts of data and the ability to take decisions and to foster a basic knowledge of Business-related majors Practice-oriented teaching in the computer and the Internet, communication-related knowledge can be used as a tool for a balanced curriculum has been set aside over.

### Department of Hotel & Tourism Management

The hotel & tourism management program is designed to meet the present and future needs of managers, executives and other professionals in the fields of hospitality and tourism. It provides students with both the conceptual and innovative analytical skills necessary for work in the ever changing hospitality & tourism sector. Major courses are hotel management, tourism principles, hotel accounting, hotel & tourism marketing, hospitality information systems, food & beverage management and internship the in hospitality & tourism industry. Graduates work in such areas as international and domestic hotels, casinos, theme parks and eateries. They also work in convention centers, ships, international convention planning, airlines, tourism research and public offices. By remaining in close touch with the public and private sector or organizations the department maintains its position at the leading edge of strategic thinking in the tourism and hospitality field.

### Department of Food Service Management

There is rapid growth and need for professionalism in the foodservice industry. The Department of Food Service Management offers the administrative knowledge and practical skills to succeed as professionals in settings such as restaurants, hotels, and institutions. Students gain hands-on experience at two modern kitchens, fully equipped labs, and a restaurant. With excellent practical training, the program offers a proper theoretical curriculum for students who want to become CEOs. Students have opportunities to acquire various certifications in cooking, food management and sanitation from a number of organizations built into the curriculum. Students are required to complete a practical field training component and student participation in contests through foodservice research projects are recommended in senior year. These are great opportunities for those looking for a job after their graduation. The mission of the Department of Foodservice Management is to meet the needs of the foodservice industry by preparing individuals to become successful professionals capable of assuming leadership roles in a dynamic, multi-cultural, domestic, and international job market.

# College of Science

- Department of Mathematics
- Department of Informational Statistics
- Department of Physics
- Department of Chemistry
- Department of Biology
- Department of Food Nutrition & Health Science
- Department of Fashion Design & Merchandising
- Department of Physical Therapy
- Department of Nursing

## Introduction

The College of Science is composed of the Departments of Numerical Science, Natural Science, and Life Science. It represents a collection of people passionate about developing education and human capabilities through research in the physical and life sciences. They are also devoted to developing new technologies that will serve the nation and the local communities. In order to produce capable individuals to serve society, the College of Science has a teaching staff of outstanding ability, and the highest quality educational facilities and materials with well equipped classrooms and laboratories that allow for a more student-centered education.

## Departments and Majors

### Department of Mathematics

The educational aim of the Department of Mathematics is to nurture students to become very active specialists, in various areas related to Mathematics, who eventually can devote to improving the quality of life of human society, as well as developing science and technology. To realize our aim, we provide a very well balanced curriculum in the area of pure and applied mathematics. All classes included on the curriculum feature computer aided instruction, deal with profound mathematical theories and lectures in the field of applied mathematics accompanied by practice in computer laboratories.

### Department of Informational Statistics

Statistics is the science of analyzing various kinds of natural, social and economic phenomena based on data. The research areas of statistics include theoretical studies, methodological development, and practical applications of theories and statistical methods. Through a balanced curriculum, the program educates students in theories and computer skills for the manipulation of data. Some students prepare for certification examinations to become specialized professionals. Our graduates can work in various organizations and fields including statistics organizations, banking organs, and information technology.

### Department of Physics

Physics is a fundamental study of the basis of all the natural sciences. The range of study is very extensive, from the microscopic world of particles to infinite structure and the principle of the creation of the universe. It plays a key role in the study the improvement of the quality of human life. The curriculum includes computational physics to train students who want to enter the fields of IT, multimedia and design as well as home teaching through the use of the multimedia.

### Department of Chemistry

Chemistry is the science of substances that comprise the world around us and is concerned with their structure, properties, and the reactions that change them into other substances. Chemists practice their profession in many ways-in educational institutions, government laboratories, private research institutions and foundations and in many industries. The Department of Chemistry has a solid undergraduate program, together with a strong graduate education and research program. These programs result in the availability of excellent research facilities and modern instrumentation necessary to train the scientists of tomorrow. The programs in chemistry prepare students for graduate studies and professional work in the chemical sciences, as well as in interdisciplinary areas that rely heavily on chemistry.

### Department of Biology

Programs in the Department of Biology aim to foster new generations of professionals with expertise and research capabilities for conducting work in life science-related fields, including education, environment, industry, public health and medicine. By learning about animals, plants and microorganisms, students understand visible and molecular structures of various organisms and principles of their organizations, together with interactions between organisms and environments or human activities. In the classroom, students acquire ample amounts of knowledge on a broad range of organisms found in daily life or natural environments. In the laboratory or the field, students conduct hands-on experiments and practice to comprehend the scientific process of observation, analysis and problem-solving, which integrates their research capabilities with real life phenomena.

### Department of Nutrition & Health Care

The Department of Nutrition & Human care is divided into food & nutrition, housing & interior design, and family health to train global leaders in the rapid industrialization of the 21st century. Therefore, new curricula are instituted for achieving the goals of two different majors and moreover are composed of courses to fill opportunities for employment in the field of child-educare and consumer center. Particularly, the Department of Nutrition & Human Care is composed of curricula easily allowing for double majors by allowing for the following choices: Food engineering and food service management in food & nutrition, interior and industrial product design in housing & interior design, children's education and social welfare in education and consumer. After completing the undergraduate program, students go on to

graduate schools or join the professional workforce to promote the quality of public health and welfare.

### Department of Fashion Design & Merchandising

The department endeavors to competently develop students' abilities in the field of fashion through practical training and ingenuity, as well as susceptibility education for expertise and development of design technologies. In addition, it aims to nurture noble specialists in the world of fashion who can contribute to the development of the fashion industry in regional terms and keeping up with acting up in compliance with global fashion trends.

### Department of Physical Therapy

Physical therapy is a health care profession that aims to enhance and restore functional ability and quality of life to those with physical impairments or disabilities. Physical therapists are primary healthcare professionals who evaluate and treat individuals of all ages who have medical problems or other health-related conditions, illnesses, or injuries that limit their abilities to move and perform functional activities. Physical therapy has many specialties including cardiopulmonary, geriatrics, neurologic, orthopedic and pediatrics. The Department of Physical Therapy is committed to the development and propagation of knowledge related to physical therapy and rehabilitation science. The Department of Physical Therapy, located within the College of Science, consists of a dynamic and professional faculty dedicated to excellence in research and education. Our goal is to educate international health leaders, contribute to our communities, and improve the health of individuals and populations.

### Department of Nursing

The nursing program is designed to provide qualified professional nurses for maintaining and promoting the health of individuals, families, groups and communities, preventing diseases, helping in recovery from illness and improving the quality of life. The courses and other disciplines offered by the department provide theoretical knowledge, assessment skills, role and leadership development, critical thinking and clinical practice in diverse settings. The program is designed to apply nursing knowledge to the nursing process which includes assessing, diagnosing, planning, intervening and evaluating as a scientific base for nursing practice. Also, it aims to provide a rich educational experience so that graduates can actively participate in improving health and take care of people who are in need of medical service in our rapidly changing modern society.

# College of Engineering

- School of Computer Science & Engineering
  - Major in Computer Engineering
  - Major in Computer and Information Engineering
- School of Architecture
  - Major in Architecture Design
  - Major in Architecture
- Department of Food Science & Biotechnology
- Department of Industrial and Management Engineering
- Department of Environmental Engineering
- Department of Civil Engineering
- Department of Advanced Materials Engineering
- Department of Electrical Engineering
- Department of Urban Design and Development Engineering
- Department of Mechatronics Engineering
- Department of Electronics Engineering
- Department of Information & Communication Engineering

## Introduction

In spite of its relatively short history, the College of Engineering has grown quickly by dedicating itself to education, research, and social service. It is particularly concerned with producing the kind of highly educated personnel needed in the 21st century. As a result, the College of Engineering was nationally recognized in 1996 for its outstanding success in forming business ties outside the university. It has also heightened the university's standing by winning an award from the Ministry of Commerce, Industry and Energy in 1998. Since 1999, it has been a leader in fostering cooperation between the university and industry. The completion of the Engineering Building also played a major role in this with its state of the art technical facilities providing a new impetus for advancement. In addition, the Computer Engineering Department received the highest national ranking in the field of computer science. All of this success ensures a bright future for both the university and the department.

## Departments and Majors

### School of Computer Science & Engineering · Computer Engineering · Computer and Information Engineering

Two former departments in Kyungsoong University, the Department of Computer and Information Science, established in 1984, and the Department of Computer Engineering, established in 1989, were combined in 2010 to form the School of Computer Science and Engineering in an effort to create leaders in the current IT-based knowledge and information age. More than 600 students are enrolled in the school, making it the largest academic section of the university. The school provides all levels of degrees, BS, MS, and PhD. Theory and practice in computer hardware and software are taught to train highly creative IT professionals. Courses include fundamentals in computer engineering, programming language, mobile programming, embedded system, artificial intelligence, computer network and system, and multimedia and entertainment.

### School of Architecture

Architecture is a program that studies the environments that develop human life by combining humanities, arts, science and other aspects of knowledge. This major offers two kinds of educational program: the architectural design program prepares student to become professional architects; and the general architecture program that encompasses a wider range of architecture.

#### Major in Architectural Design

The Major in Architectural Design offers a 5 year-degree to develop professional architects through intensive programs focusing on design studios in achieving humanities comprehension, art practice and scientific knowledge in order to be eligible for an architect license.

#### Major in Architecture

The General Architecture major offers a 4 year-degree program that guides students to become public officials or other professionals, as well as to more advance degrees, by acquiring specialized knowledge regarding architectural planning and history, design, structure, environment and construction.

### Department of Food Science & Biotechnology

The Department of Food Science & Biotechnology was founded in 1979 and has trained many capable students. Food is an essential material for human growth as well as for the maintenance of human health and life. The food industry plays a major role in industry, and, thus, is one of the most promising fields in the 21 century. This department provides education and research on food and biotechnology regarding the basic science and industrial production technology. In addition, we provide on-site practice-based education including manufacturing technology, product development, quality control, food hygiene, and unit operation, as well as basic and practical study of functional foods, processed foods, food palatability, microorganism, fermentation, enzyme, functional proteins, or bioactive compounds.

### **Department of Industrial and Management Engineering**

Industrial & Management Engineering is considered important for all the industries in the advent of the 21st century information age as it pursues development, improvement, and evaluation of integrated industrial systems consisting of people, money, information, equipment, energy and materials. The goal of the department is to study and apply systematic methodologies for planning, design, and operation to optimize the reliability and performance of industrial systems. The subjects the department offers include operations research, statistics, and computer programming as basic subjects. It also offers technology management, production management, work study, facility planning, quality management, reliability analysis, simulation, factory automation, artificial intelligence, product design and development, logistics, ergonomics as applied subjects. Theory and practical training provided in the systematically organized courses train the best industrial & management engineers, thereby improving productivity and quality, and saving costs in complex industrial systems.

### **Department of Environmental Engineering**

The Department of Environmental Engineering has performed a leading role in resolving the problems of environmental pollution and educating prospective environmental engineers since its establishment in 1984. The objectives of the undergraduate program are to educate students to be highly competent environmental engineers and to research pollution abatement technologies. The environmental engineering program covers water supply, water and wastewater treatment, air pollution, solid and hazardous waste management, land geological pollution protection, and earth environmental system. The environmental engineering program acquired the accreditation of ABEEK (Accreditation Board for Engineering Education of Korea) in 2010 to assure and enhance the quality of educational programs in environmental engineering.

### **Department of Civil Engineering**

Civil Engineering is an academic branch of academics which improves and maintains nature and the environment and makes life more convenient. It has a long history, as well as modern cutting-edge applications, as the way to construct basic social facilities of a country. It deals with planning, design, construction and maintenance of structures such as roads, rails, dams, ports, airports, subways, bridge, plants and water and sewages facilities which constitute the basic infrastructure for human civilized activities. As a means of studying relevant theories and techniques, this can be a fascinating major that can give students a feeling of accomplishment if they are interested in the public good. In the Kyung Sung University Department of Civil Engineering, four laboratories allow students to get site specific engineering experiences and have a more fruitful campus life, thus giving undergraduate students chances to participate in civil engineering research activity.

### **Department of Advanced Materials Engineering**

The Department of Advanced Materials Engineering at Kyung Sung University was officially formed in 1986. The department has established a curriculum that will provide future generations of responsible material engineers. Our undergraduate program takes a systematic approach in providing fundamental principles in physics, chemistry, materials science and manipulating metals, ceramics, polymers, and electronic materials. The graduates of our department play a central role in the domestic material engineering industry.

### **Department of Electrical Engineering**

The Department of Electrical Engineering is one of the collaborative and interdisciplinary departments in the College of Engineering since the application of electrical engineering has strong ties to many industries. Fundamental knowledge of electrical engineering has contributed to other engineering departments such as mechanical, advanced materials, civil, environmental and architecture engineering. The department's curriculum is specialized to student academic backgrounds and practical skills in sub-topics

categorized as: power delivery & conversion, control for estimation and decision, electrical rotating machines, power electronics, and electronic materials and plasma discharge. All faculty members in the department have been focusing on improving the quality of education to allow each student to become a creative engineer in his or her own specialty. As a result, various laboratory courses have been included in the curriculum to increase hands-on experience, and several prerequisites such as microprocessor, CAD, and computer programming are available to meet students' needs and future objectives. In addition, due to a boost for the need for high-quality education, a program for systematically optimizing all courses in the department was established in 2007. The program is aimed at making courses more coherent and design-oriented. In particular, there are many possibilities for students to participate in research projects sponsored by industry or in academic studies advised by a faculty member, activities which will enrich students' careers and motivate students to find better jobs.

### **Department of Urban Design and Development Engineering**

Urban engineering is an interdisciplinary discipline, which is closely associated with urban planning, urban design, urban development, urban information systems, transportation planning, real estate, and social science. Founded in 1998, the Department of Urban Engineering at Kyungsoong University has provided students with practical skills, as well as academic knowledge, through a well-organized practical management education curriculum. The department offers a unique and stimulating learning environment, where students are encouraged to achieve academic success through exposure to a diversity of viewpoints on urban regeneration and urban reservation. Our department also provides students with a specialized curriculum for successful careers with a focus on urban innovation and societal impact.

### **Department of Mechatronics Engineering**

The Mechatronics Department is aimed at educating skilled and talented professional to be future leaders in the field of mechatronics. The field is a fusion between electrical, electronic, robotic and mechanics engineering, an essential part of today's high-tech industry. We train experts in the design, manufacturing and control of automation, electromotive force and robotic systems. Over half of our classes are based on practical training and exercises that empower students with the skills needed to thrive in the industry. Moreover, students are involved in self-motivated engineering projects and annual exhibitions to further enhance their capabilities. Certified program of ABEEK (Accreditation Board for Engineering Education in Korea)

### **Department of Electronic Engineering**

Electronic Engineering at Kyungsoong University is an essential department in the current IT centered world. As one of the top countries in the Electronic Engineering field, Korea attracts many foreign students to study Electronic Engineering. After graduating from our department, students can work for various companies including Samsung Electronics, LG Electronics, Hyundai Motors, STX and Hanjin Heavy industries. Our department provides various classes including electronic circuits, digital circuits, signal processing, telecommunication systems, semiconductor circuits, embedded systems and control engineering. In our department, even undergraduate students can join each professor's laboratory so that they can gain experience in participating in various competitions and conferences.

### **Department of Information and Communication Engineering**

We educate students to be specialized in developing high-speed wireless communication technology, high-speed optical communication technology, digital communication networks, multimedia terminals and devices, and multimedia processors. In addition, the department nurtures professionals in researching and developing the technologies for establishing on-line systems based on client-server systems that provide data processing, saving and searching through networks.

# College of Pharmacy

## Introduction

The College of Pharmacy was founded in March 1982 with the goal of serving human welfare through the training of qualified pharmacists and pharmaceutical researchers. Since that time it has grown continuously. To make the curriculum more efficient, multimedia and audio-visual techniques are actively employed. Students also have internships at pharmacies and drug companies. The school has expanded the program to six years. A new pharmacy building with excellent educational facilities opened in 1999.

## Departments and Majors

### College of Pharmacy

The College of Pharmacy offers a B. S. program in pharmacy. This program gives students a basic background in medicinal chemistry, pharmacology, microbiology, biochemistry, hygienic chemistry, analytical chemistry, pharmacognosy and pharmaceuticals. The students in this program receive an intensive education in the field of physical properties, mechanisms of action, admixture, dispensing and administration of drugs, and academic theories applicable to clinical practice.

# College of Arts

- School of Sports and Health
  - Major in Physical Education
  - Major in Sports Medicine
- School of Music
- Department of Fine Arts
- Department of Craft Design
- Department of Dance

## Introduction

The College of Art employs a group of outstanding professors, and is equipped with a concert hall, state of the art small theater, and a large art gallery. The quality of these facilities is highly regarded, as evidenced by the fact that other universities and groups often wish to use them. The college aims to give students a broad, international base in the arts by actively supporting exchanges and exposing students to the culture and art of many different countries.

## Departments and Majors

### School of Sports and Health

The Department of Physical Education and Dance was first opened in 1981, and the Department of Physical Education become independent in 1984. Many graduates have since become middle and high school teachers, sports-related researchers, professors, social sports organization coach, government officials, military officers, and involved in sports-related personal businesses. Starting in 2011, the department was reorganized into the School of Sports and Health that oversees the Major in Physical Education and the Major in Sports Medicine.

### **Major in Physical Education**

The goal of the Department of Physical Education is to develop leaders in advancing various sports areas. In addition, the focus has moved from teaching physical education theory and athletics to training physical education teachers, leaders and athletes. The department was reorganized in 2006 in order to provide students with theoretical and practical knowledge of sports science in a more efficient environment.

### **Major in Sports Medicine**

The Major in Sports Medicine, established in 2011, focuses on the basic theories of physical education and sports medicine and includes practical classes. Sports medicine-related work in medical institutions required for the future, as well as health-related coached, are developed through this program.

### **School of Music**

There are five areas of specialization in this school: piano, orchestral music, vocal, composition and art management. The goal is to educate and train professional musicians who will play a vital role in modern culture. The school offers a range of courses from art management to high level music.

### **Department of Fine Arts**

The department seeks to instill in all students aesthetic judgment, professional knowledge, collaborative skills, and technical expertise. With a firm grounding in the studio arts and through seminars, the program blends theory with creative applications in preparing graduates to become leaders in their professions.

### **Department of Craft Design**

The Department of Craft Design of Kyung Sung University opened about 30 years ago and has grown into a model craft design school in Busan and Kyungnam. The major is divided into metal art design, ceramics design, furniture design and textile design to educate professionals through a balance of art and industry. Craft Design students have many career opportunities and access to work in various fields of activity due to a complex integration of diversity, professionalism and popularity from mass design to private artist fields. As craft design is closely related to daily life, its application to culture in general through design education focused on formativeness is encouraged. Only continuous and diverse efforts enable student to have knowledge and specialties required for finding a suitable career. As concern for a better quality of life grows these days, craft art is establishing itself as a feature of a healthy approach to life.

### **Department of Dance**

The Department of Dance was established in 1980 as part of the Physical Education and Dance Department. In 1983, it became a separate and independent major. It reformed its curriculum and modified its course framework to include more suitable and systematic study programs to meet the demands of students wanting to be successful and well-qualified dance professionals.

# College of Theology

## ■ Department of Theology

### Introduction

The College of Theology operates in accordance with the founding Christian ideology of Kyung Sung University. Its goal is to cultivate capable and compassionate graduates through religious education. It provides specialized experts in theology and academic research.

The college is not affiliated with any one branch of Christianity. This ecumenical approach allows a broad study of theology from many perspectives. The faculty members have studied at famous theological colleges throughout the world. A library with over 30,000 volumes related to theology, a language laboratory with modern equipment, and other facilities provide excellent resources for academic activities.

### Departments and Majors

#### Department of Theology

The Department of Theology at Kyung Sung University retains ecumenical characteristics necessary to transcend barriers that exist among multi-Christian denominations. The purpose of this seminary is to train and equip Christian men and women as leaders in God's great kingdom. The theological atmosphere balances ecumenical faith and humanity in Busan and other provinces. By focusing upon leadership training, the department takes responsibility and pursues the revival of this Korean society. The Theology Department values the integration of doctrine with spirituality and, the exploration of truth through self examination. The seminary develops mature leaders with such qualities. As a result, Christians grow in Christ, experience Christ-centered communities, and share the love of Jesus with their neighbors. The combined emphasis of these activities attempts to advance the kingdom of God through training Christians in biblical theology at Kyung-Sung University.

# College of Multimedia

- School of Digital Contents
  - Major in Digital Image,
  - Major in Digital Animation
  - Major in Digital Media
- Department of Theater and Film
- Department of Visual Communication Design
- Department of Interior Design
- Department of Product Design
- Department of Mass Communication
- Department of Advertising & Public Relations
- Department of Photography

## Introduction

Kyungsung University has been recognized four years in a row for outstanding specialization in multimedia. It continues to boldly change existing educational paradigms by bringing together separate disciplines through multimedia education. The College of Multimedia was established in 1999 with the goal of producing experts in the field and fostering a future-oriented educational environment on campus.

## Departments and Majors

### School of Digital Content

The digital content media industry, which includes digital images, games, animation, mobile content and digital sound, has been promoted by the government as the next promising industry. The School of Digital Content has been established to train professional human resource assets in such areas in Korea. CT covers planning, producing and marketing Culture Content. Our goal is to train professionals who can produce various genres of content by combining creative stories and digital technology. This school is the specialized major for Culture Content. Under the title NURI (New University for Regional Innovation), the school has received a 3 billion won annual government grant for 5 years. This school is famous for job-oriented education that includes industry participation, various content producing equipment and infrastructure, international certificate courses, international student exchange programs, and industry / university cooperation.

### Major in Digital Image

The mission of the undergraduate major in Digital Moving Image is to educate students in the art, craft, and technology of digital media including digital television, interactive media, video and mobile in the processes of pre-production, production, post-production. Our goals include the development of individual talent and skills for the One-Person-Production-System. Necessary skills for that system, such as writing, directing, camera-shooting, editing and graphics, are covered in our programs. We encourage students to become creative and thoughtful practitioners in the world of media. We also support a strong internship program offering a wide range of options for a professional job.

### Major in Digital Animation

Animation, character and game industries are key fields in culture content that have emerged as higher value-added businesses in the 21st century. Nowadays, as media change so rapidly, there is a demand for creative production personnel who can work in all facets production whether it is TV animation, computer game animation, comics publishing, animation for mobile and clay animation. We aim at training high quality people who have a highly theoretical approach and capacity to produce animation using traditional drawing methods, as well as digital technology. We provide an on-site practice-based education with the related companies.

### Major in Digital Media

This major trains professionals who can plan and produce new types of media services according to the rapid change of media environments, such as ubiquitous media content (WiBro, mobile internet service, DMB, smart phone), interactive TV content, Artificial Intelligence content, Emotional content, Virtual Reality content, Social Network Service (SNS), and Home network content in the era of Digital Life. These kinds of newly emerging media and content require rapid adaptation to the New Media, which continually changes according to the development of information and communication technologies, boundless imaginations, innovative minds and challenging spirits. The Digital Media major has set a goal to nurture professionals in the area of Convergence Media, which overcomes the limitations of existing media.

This program studies theories and businesses of photography in realistic and scientific ways. The program also includes a curriculum, first established in October 1984, with the purpose of open education to develop each student's personality. As a mecca for photography education in Pusan, KSU created a new curriculum allowing students to develop intelligence and sensitivity with a digital base. This specially designed educational system allows students to survive in various IT environments.

# College of Chinese Studies

- Department of Chinese Language and Literature
- Department of Chinese Interpretation and Translation
- Department of Chinese commerce

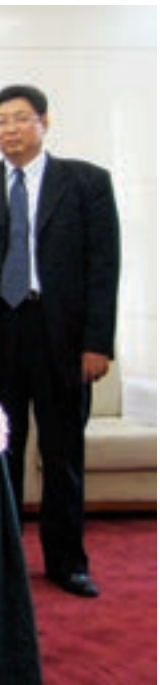

## Introduction

The new Chinese College to cultivate global talents who will act as China specialists in the international community will make China study more systemized for the first time in the country by combining the study of language, culture and trade. The college will be a good education model to follow for Korean universities who wish to be globalization leaders.

The Chinese College will play a think tank role for China issues, aiming at cultivating those specialists for globalization, commercialization and local sites to be of the most priority based on Chinese language along with "Independent Campus Program", "Differentiated Curriculum", "Operation of Excellent Faculties" and "In-Depth Curriculum for Students".

## Departments and Majors

### Department of Chinese Language & Literature

The Department of Chinese Language and Literature was established in 1980 with the aim of comprehension and research of Chinese language, literature, and culture. Since then, the Department has continuously developed and established master's and doctorate programs in the General Graduate School and a master's program in the Graduate School of Education. In 2011, the Department of Chinese Language and Literature was made an independent School of Chinese Studies to better develop experts in the practical fields of Chinese studies. The College requires double majors to conduct academic activities in Chinese. A total of 1,500 graduates from the department are actively working in relevant fields as professionals throughout the world. The college includes 7 professional full-time professors, 3 visiting professors, and 3 native Chinese professors. All professors endeavor to make the students leading experts in Chinese studies. The goals of the program are promoting expert comprehension of China, high language skills, and an international sense of the new global generation connected to China.

### Department of Chinese Interpretation and Translation

The College of Chinese Studies was established in 2011 and is divided into three departments.. The Department of Chinese Interpretation and Translation is one department that is designed to develop globalized professionals in interpretation and translation with an have extensive knowledge in regional studies and human & social Sciences, including literature & arts, politics, economy, society and culture, as well as excellent language fluency to facilitate international communication and contribute to national development. We have confidence that ambitious students can meet any goals through a systematic curriculum that concentrates on practical and academic ideas from an experienced faculty. By developing world-class professionals in interpretation and translation, the department promotes all round overseas study and requires that students participate in hands-on training at least 4 times before graduation. The department especially encourages double majors to attain more rewarding outcomes.

### Department of Chinese Commerce

The Department of Chinese Trade and Commerce was established with the aim of developing experts with academic knowledge of Chinese language and culture. For this purpose, the curriculum of the department is based on the business environment between Korea and China to assist students in acquiring a specific understanding of Chinese trade and commerce from general and detailed perspectives. We encourages student training in China, Chinese market research, and exchanges with universities in the USA. Furthermore, we plan to found and manage a trade corporation through which our students will receive practical training designing and managing a business.
