

Mobility regulations for incoming ERASMUS students

Below are the aspects that must be met by ERASMUS students who wish to carry out their international mobility at the Faculty of Health Sciences of the University of Malaga:

- Academic agreements must be reviewed and signed by the Vice Dean of International Relations and by the Dean of the Faculty of Health Sciences.
- International mobility under the traineeship modality is NOT accepted
- Students will NOT be able to enroll in subjects that are incompatible due to schedule. Only agreements will be accepted, except for particular agreed exceptions, in which, at most, subjects from two different academic years are taken, since the schedules or practices may overlap.
- It is recommended that the schedules and subjects published on the website of the Faculty of Health Sciences be reviewed, depending on the degree in which the student wishes to carry out the mobility: [https://www.uma.es /faculty-of-health-sciences/](https://www.uma.es/faculty-of-health-sciences/)
- Students are required to enroll and take the entire subject. It is not possible to partially study a subject.
- The Faculty of Health Sciences reserves the right of reciprocity in case there is a high demand for applications to carry out clinical practices in some of the undergraduate degrees offered in this center: Nursing, Physiotherapy, Podiatry and Occupational Therapy.
- It is not possible to accept clinical internships without the home institution proving that you have passed the necessary prior skills to be able to carry out the requested internships.
- The incoming student must present, together with the learning agreement, a document in which it is accredited, by means of a signature, that: the incoming student knows the ERASMUS regulations that regulate the elaboration of the learning agreements established by the Faculty of Sciences of the Health of the University of Malaga, and that the learning agreement has been made in compliance with said regulations. Any anomaly in the learning agreement will be the responsibility of the student and, in the event of an anomaly, it will force a change to be made in the learning agreement that allows compliance with current regulations.
- This regulation has been approved by the International Relations, Mobility and Cooperation Subcommittee of the Faculty of Health Sciences unanimously in the call held on February 10, 2022.
