

## **DEGREE IN PODIATRY**

**“Every long road begins with a first step”**

Podiatry will prepare the student to specialise in foot diseases and their treatments. It is a young degree which provides theoretical and practical training that enables the prevention, diagnosis and treatment of foot disorders and deformities, as well as its connection with the rest of the locomotor system, either independently or in collaboration with other professions (surgeons, traumatologist, physiotherapists, and other clinicians).

**Title of Degree:** Graduate in Podiatry

**Responsible Faculty:** Faculty of Health Sciences

**Faculty where it is offered:** Faculty of Health Sciences

**Credits:** 240 ECTS-4 year(s)

**Field of knowledge:** Health Sciences

**Type of teaching:** in person

**Regulated profession:** yes

**Publication in BOE:** 07-09-2010

**Year of implementation:** 2009

**Number of places:** 65

**Languages used:** Spanish and English

**Status:** Implanted

<b>Subject</b>	<b>Semester</b>	<b>Character</b>	<b>ECTS</b>

Self-report academic year 2015-2016

Final Monitoring Report Degree Podiatry 2015-2016

The first two courses focus on students obtaining basic knowledge about the fundamental health aspects of this profession. Although there are specific podiatry subjects in the first and second years, it is in the third and fourth years when the knowledge of diagnosis, treatment and prevention, among others, is deepened. The external internships are carried out in different private centres and the Teaching Assistance Unit located at the Faculty, during the third and fourth years, under the supervision of clinical and academic tutors. Finally, in the 4th year, the Final Degree Project is carried out, where students integrate the knowledge of the degree oriented to Podiatry.

Classes, seminars on the subjects and external practices are held in the morning and afternoon.
