

Welcome to FII;)CA, an ERASMUS+ project inspired by the cherished Swedish tradition of 'fika.' At FII;)CA, we explore the intriguing question:

"How do you enjoy virtual coffee?"

While you can't physically sip a virtual cup, we are here to recreate the essence of 'fika' in the virtual reality realm.

Our mission is to delve into **social** virtual reality (SVR) platforms, uncovering their capabilities and limitations.

We guide students in designing meaningful scenarios and virtual spaces for social activities in SVR, fostering a new way of connecting and interacting.

A New Generation of Virtual Natives

Today's youth—growing up on platforms like Roblox—are digital natives fluent in virtual worlds. For them, socialization, creativity, and play happen in immersive, unregulated environments. As they transition into higher education, they bring expectations shaped by these experiences, challenging institutions to evolve accordingly.

Our Commitment

FII;)CA is building a framework for integrating SVR into education, merging traditional principles with cutting-edge technology. Our mission: to empower institutions to create dynamic, interactive learning experiences that prepare students for a future shaped by virtual innovation.

Pioneering the Future of Education

FII;)CA envisions educational institutions as leaders in social virtual reality. By developing structured, safe, and engaging virtual environments, we ensure that immersive learning aligns with academic values while meeting the digital instincts of future learners.
